## Assignment 6: Advanced Dashboards

Jesse Conlon

3/1/20

This assignment required generating various graphics with Tableau and placing them into a chart with the purpose of gaining functional familiarity with Tableau. The data source provided is “Sample Superstore.xlsx”, which includes various sales figures of products across the United States. This particular assignment features:

- At least 3 visuals (all different types)
  - One density map
  - One area chart
  - One bar graph
- A common filter that applies to all visuals
  - A filter allows the selection of a state
  - There is also a table provided which gives exact sales figures by state and city.
- Publish to tableau public:
  - The following is a link to the dashboard of the complete assignment:
